

## A day trip at the San Blas Islands

You will leave from Panama early in the morning. A jeep will pick you up from the hotel and will take you to the wilderness of the jungle in about three hours. A journey through the times in the territory of Kuna lala, the local rulers of **San Blas**. Jurassic Park is nothing in comparison!

- You will get the landing of Carti, greeted by smiling **Kuna**, always colorful and festive. You will enjoy a South American aperitif, a cerveza or one jugo ice cream.
- A motor launch will take you directly to the ship that you have booked for.
- Welcome to **Checheme**. From this moment you will begin to experience something unique: no clocks, visas or shoes. There is nothing here: shops, hotels, electricity, water. Only nature. You will experience the continuation of your holiday in an idyllic location surrounded by unknown worlds between the Kuna and the neverland.

**MORNING** - Wake up with a dip in the azure sea. Water is always at 26 degrees. After an hearty breakfast made of exotic fruits such as papaya, mango, banana, pine cone, passion fruit, coffee and eggs, you will land on the island to know the friendly Kuna that will give you an energy coconut milk collected on a palm and especially for you.

Always by the **dinghy** (our small boat) you will snorkel among coral gardens and colorful fishes, also getting the opportunity for an underwater photo shooting.

**LUNCH** - Back to the boat you will taste a piece of spaghetti lobster, rum, curry and you will relax in a cheerful and convivial atmosphere.

**AFTERNOON** - A walk between the palms of **big Checheme** and the deserted beaches like a postcard. You will visit the huts of the Kuna also to discover their crafts.

**EVENING** - Ready for the sunset? You will enjoy at the **small Checheme** in Café del Mar. Two huts of a local family where you will drink an icy cerveza, sitting on palm trunks or remains of sunken boats, just in front of a beautiful sunset.

The sun goes down on the reef, accomplished by the music of the waves breaking on the reef. A moment that unites all: Indians, captains, sailors and customers around the world.

**DINNER** - On the land, or if you prefer on the boat with all the comfort, cooking a "snappers gnaw" grilled. The finale of the evening will vary: a romantic night in the hammock under a starry sky or a party on the ground. To finish the night, everyone in the world of Morpheus lulled by the velero.

**The following days other adventures will await for you:** the discovery of the sunken wreck, deep-sea fishing from one island to the other. You will rise up the **Narganà** river and you will walk in the jungle taking a bath in a small lake and getting a descent with donuts driftwood.
